

Portable Ramps

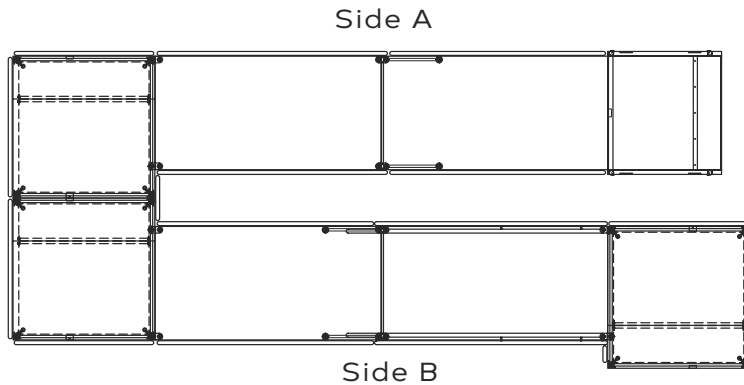

Accessibility

Many venues and events require ADA accessible spaces, which is why Sightline Commercial Solutions offers portable accessibility ramps to match up to its portable platforms. These ramps are available to match your stage height, whether it is fixed or adjustable. Additionally, Sightline Commercial Solutions portable ramps can be custom designed to meet the needs of the space. To make ramps compliant with ADA standards, Sightline Commercial Solutions recommends and provides slip resistant surface along with a continuous handrail.
