

Project: Theater At MGM National Harbor
Customer: Theater at MGM National Harbor
Completion: November 2018

Location: Oxon Hill, MD
Partners: November 2018

Scope: Located on the majestic Potomac River waterfront, the Theater at MGM National Harbor is an entertainment hub for Washington, D.C., and Maryland residents. To ensure the guest experience is both safe and enjoyable, Sightline Commercial Solutions supplied approximately 600 linear feet of custom black anodized aluminum guardrail, handrail, and aisle rail with stained red oak top rail for use on a large, retractable seating riser system. The railings were designed to fit on rolling carts to facilitate easy storage and deployment when the retractable seats are not in use or are configured in alternate formats. Additionally, several 5-tread rolling stair units were created for use in conjunction with the seating system to guide patrons to and from their seats during touring musical acts, sporting events and more.

Sturdy railings guide patrons to and from their seats during touring musical acts, sporting events and more.

Approximately 600 linear feet of custom black anodized aluminum guardrail, handrail, and aisle rail was used.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
