

SC2000 Seating Riser Support

Understructure

SC2000 Seating Riser Supports are ideal for facilities that have flexible seating needs. The ability to easily change the seating accommodations of your venue can enhance performances and increase revenue. Our seating risers are designed and engineered to provide maximum flexibility for challenging configurations that demand quick and easy setup.

The key features of the SC2000 are its quick setup, flexible configurations, and compact storage. The understructure unfolds like an accordion and expands to fill the designated space. Only two people are required for setup and custom sizes are available to fit into even the most unusual spaces. Should you need less or no seating at all, the SC2000 folds into 15% of its expanded size and easily rolls away on retractable casters for storage.

SC2000 Seating Riser Support

Understructure

Advantages

SC2000 understructure is rolled into place on casters and then lowered onto its legs with a turn of a lever. Platforms can be in place while understructure is rolling on its casters.

Platforms bridge between SC2000 understructures, saving time with fewer understructures to setup and strike.

Rotation of arms around castings provides a smooth and quick fold for setup and strike. SC2000 is quickly and easily setup by two people. For use with all of Sightline Commercial Solutions' platforms. SC2000 storage position is approximately 15% of its expanded size.

Technical Specifications

Casters:

- 4" Fully retractable swivel casters.
- Attach to the base of understructure to ease the extension, closure and transport of understructure.
- Engage and disengage using a lever arm handle.
- Disengaging the casters allows full support of seating riser on main vertical columns.
- Maximum lever handle force requirements meet OSHA regulations.
- 3" (76 mm) fine adjustment through use of integral acme thread adjustable screw foot.
- Capable of being erected by two people without tools, and must fold to 15% of overall length.
- Main vertical members: 2" x 2" (51 mm x 51 mm) by 14 gauge carbon steel square tubing
- Main horizontal members: 2" x 2" (51 mm x 51 mm) by 14 gauge carbon steel square tubing
- Cross bracing: Low carbon HR flat bar
- Main pivot connection: steel tube bracket
- Finish Options: Black powder coat
