

Bank of America Stadium

Sports Arena

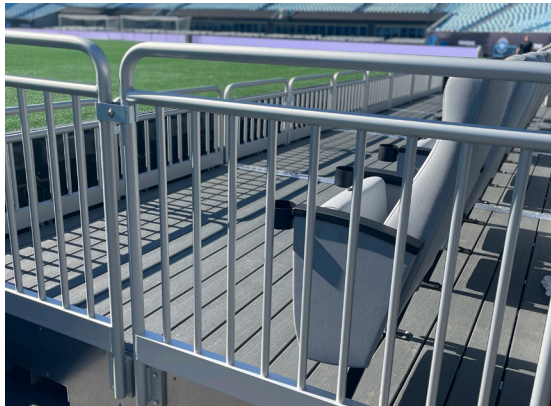

Project: Bank of America Stadium
Architect: Populous
Completion: April 2022

Location: Charlotte, NC
Contractor: Rodgers Builders

Scope: In 2022, Bank of America Stadium underwent soccer-specific renovations to transform the home of the NFL's Carolina Panthers into an elite venue that now doubles as the home field for the city's Major League Soccer (MLS) team, Charlotte FC. The \$50 million project included enhancements to spaces throughout the stadium, including the main concourse, supporters' bar, locker rooms, players tunnel, premium club and new field-level VIP seating. Sightline Commercial Solutions enhanced the VIP seating area to allow for easy conversion between the MLS and NFL seasons. Seating risers were paired with Griprail and high-performance, low-maintenance composite decking to create the exclusive and versatile viewing section. The Surround Foam System adds comfort and maintains a cool temperature for long-lasting use, and the patented drop-in assembly simplifies installation and servicing. The section also can be configured with Sightline Commercial Solutions' camera platforms to provide unobstructed sightlines for media and camera operators.

Sightline Commercial Solutions VIP Seating provides an upgraded fan experience

Lightweight yet sturdy code-compliant guardrails keep fans secure

Portable ramps provide ADA compliant access for patrons

Convenient portable stair units provide quick and safe access

Platforms with composite decking provides longevity with aesthetic

Luxurious comfort provide fans with the best seats in the house
