

Vertis Green Hills

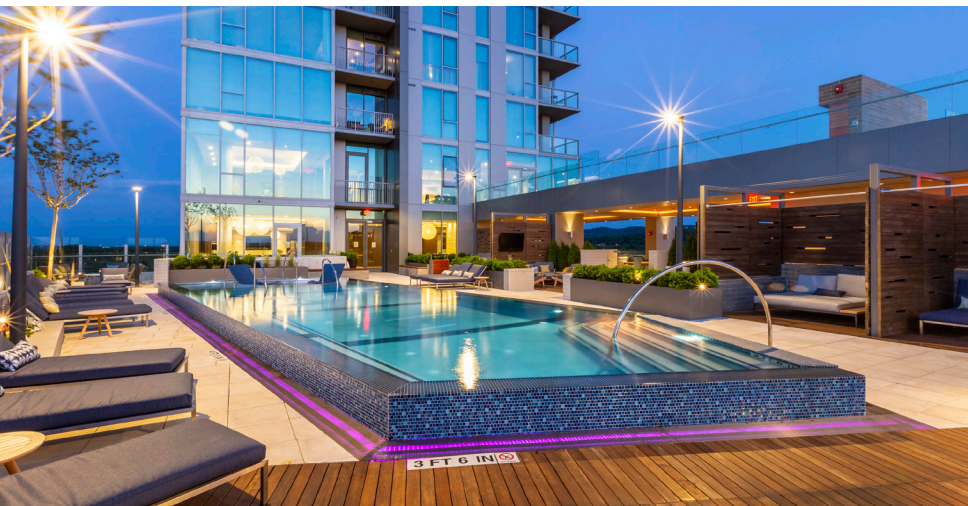

Mixed - Use

Project: Vertis Green Hills
Architect: Hastings Architecture
Partners: Cardinal Glass

Location: Nashville, TN
Contractor: Charlotte Glass Contractors
Completion: October 2019

Scope: Vertis Green Hills is a 22-story luxury lifestyle mixed-use community, located just minutes from the heart of the Music City. With some of Nashville's most prominent companies, restaurants and boutique gyms as its tenants, 'The Vertis' draws a savvy, metropolitan demographic to live, work and play. The upscale complex provides an exceptional living experience with multiple styles of deluxe apartments and lavish community amenities. Among the building's many highlights is a rooftop terrace with a heated saltwater pool and expansive sundeck all surrounded by Sightline Commercial Solutions' award-winning Ascent™ Glass Windscreen System. Sightline Commercial Solutions also engineered custom Glass Guardrail for the building's various entrances to complement the sleek exterior and optimize sightlines. As one of the few buildings to enjoy sweeping views of this growing city's skyline, these glass railing solutions both preserve and capitalize upon the stunning cityscape, leaving a lasting impression.

Ascent Windscreen with 1/2-inch clear tempered/laminated glass lines the 11th floor heated saltwater pool, providing wind protection and privacy for pool patrons.

The clean elegance of the custom-designed Glass Guardrail enhances safety and style along exterior staircases and overlooks.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
