

**Project:** nexAir Headquarters  
**Architect:** LRK, Inc.  
**Partners:** Cardinal Glass

**Location:** Memphis, TN  
**Contractor:** Grinder, Taber & Grinder, Inc.  
**Completion:** May 2017

**Scope:**

When nexAir, one of the largest distributors of atmospheric gases and welding supplies in the country, moved its corporate headquarters to a new location in Memphis, Tennessee, the company wanted an office space to match its industry-leading reputation. Sightline Commercial Solutions worked with Tull Brothers, Grinder, Taber, & Grinder, Inc., and LRK, Inc. to provide the nexAir headquarters lobby with a glass staircase that looks as light as air. The result is a polished and modern lobby that sets the tone for the building's aesthetic appeal.

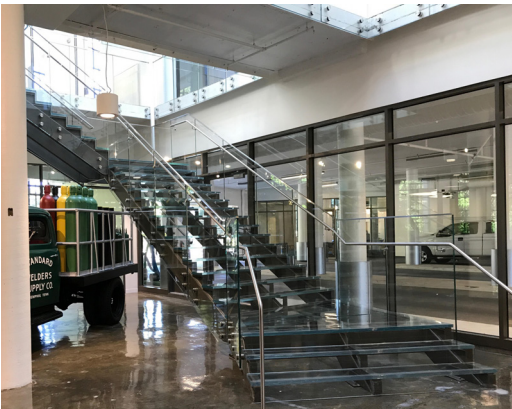

The overlook glass was attached with a through bolt on the lower nodes and an epoxy anchor for the top.

Glass treads and risers were attached using three-inch-wide, clear VHB tape, adding to the illusion of invisibility.

Tread comprised of low-iron glass with an anti-slip sandblast etch adds functionality while maintaining the design intent.

Point™ Series and glass treads and risers were used to create a clean, minimalist look for the building lobby.

Glass treads and risers, combined with Point Series railing system, give this staircase a seamless, barely there appearance.

The client wanted the illusion of invisible treads, this was achieved with Point Series and glass treads.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
