

Platform Closure Panels

Accessories

Closure panels are constructed of 1" (25 mm) thick plywood substrate with a HDPE or carpet surface to match platform or 1/8" aluminum panels for SC97 platforms. They act as a chair stop and prevent tripping, quickly and securely attaching to platform extrusion with no loose parts while providing a finished look.

Tech Specifications

- Attach without tools and easily removable.
- Material:
 - 1" (25 mm) Plywood substrate with high density polyethylene tee-molding along edges .
 - 1/8" (3 mm) aluminum sheet
- Attachments: Snap-on clips with "button-lock" spring pins or set screws to platform frame.
- Finish:
 - Plywood: HDPE (black or grey), Black Carpet,
 - Sheet Aluminum: Anodized (clear or black), Powder coat.

Custom materials and finishes also available.
