

# Pablo Center Theater

**Project:** Pablo Center At The Confluence  
**Architect:** Strang, Inc.  
**Completion:** July 2019

**Location:** Eau Claire, WI  
**Contractor:** Market & Johnson

**Scope:** Located in the heart of downtown Eau Claire, Wisconsin, Pablo Center at the Confluence brings creativity, educational opportunities, elegant events and world-renowned artists to the Chippewa Valley. Adding to the elegance and modernity of the facility's 1,200-seat Broadway-quality RCU Theatre is a beautifully crafted Bravado® Acoustical Shell custom designed by our engineers. Comprised of curved towers and ceiling panels with integrated lighting, the modular components work together to deliver optimal sound quality and an attractive background. Distinguishing the shell from other systems is its signature blue color. While most theaters choose neutral colors like tan, brown or white, the Pablo Center team wanted something that made a visual statement as dramatic as its performances, while providing a welcoming, engaging and uplifting atmosphere. Sightline Commercial Solutions was happy to oblige, contributing to one of the country's most unique and captivating theater settings.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
