

Audi Field

Soccer Stadium

Project: Audi Field **Location:** Washington, D.C.
Architect: Populous | Marshall Moya **Contractor:** Turner Construction
Completion: November 2018

Scope: Expertly tucked behind Nationals Park in Southwest D.C., and featuring views of the U.S. Capitol and Washington Monument, is the stunning new Audi Field. Home to the D.C. United MLS club, this state-of-the-art stadium is an oasis for soccer fans in the heart of the nation’s capital, featuring 20,000 seats, 24 suites, two clubs, VIP lounge areas, a rooftop patio, retail space and more. With its sleek profile and fan-centric design, every seat feels like you’re near the pitch and right on top of the action, offering a one-of-a-kind supporter experience. Sightline Commercial Solutions engineered more than 18,000 linear feet of architectural railing for the 438,000-square-foot facility, adding safety and style throughout – from the seating bowl to the MVP rooftop deck, and the grand stairs to the players’ bench. Additionally, our team custom designed fencing, gates and architectural metal work for the team store and seating bowl contour.

Tensiline™ Cable Railing with drink rail top mounted adds comfort and convenience to the MVP rooftop deck.

Tensiline Cable Railing can be found in front of the seating bowl, aisles, suites, overlooks & club patio. Courtesy Rail on the perimeter.

A 6,320-square-foot custom perforated panel wall surrounds the entire north face of the East Building.

Griprail™ is floor mounted in the aisles, offering a graspable handrail for supporters as they walk.

Horizontal Classic Picket Railing is face mounted into concrete in the vomitory areas and in front of ADA seating sections.

Custom engineered perforated fencing and gates surround the entire site perimeter, completing the design of the stadium.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
