

Acoustical Shell

Project: Shadow Mountain High School
Completion: March 2016

Location: Phoenix, AZ

Scope:

To optimize acoustics for student performances and events at Shadow Mountain High School's North Valley Arts Academy Theatre in Phoenix, Sightline Commercial Solutions supplied the facility with a custom Bravado® Acoustical Shell. Perfectly crafted to meet the venue's visual and acoustical needs, the system features four elegant mobile towers with panels measuring 20' high and 4' wide. Doors at the bottom of each panel allow for easy stage access and movement. The modular panels are surprisingly lightweight and can be reconfigured to accommodate different performance and audience sizes. The system also includes an easy-to-use wheeled mover that makes transporting and storing towers simple and efficient.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
