

University of Cincinnati Fifth Third Arena

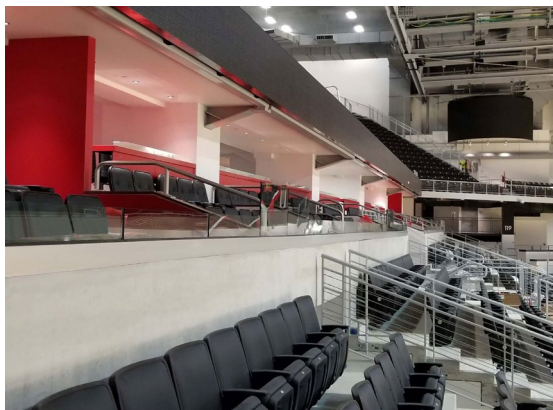

Arena

Project: Fifth Third Arena **Location:** Cincinnati, OH
Architect: Moody Nolan | Populous **Contractor:** Skanska
Partners: Cardinal Glass **Completion:** November 2018

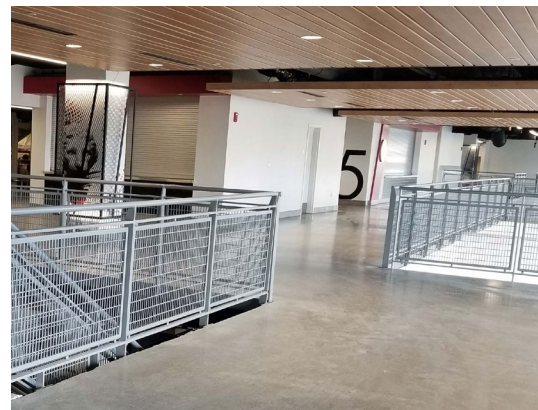

Scope: The University of Cincinnati’s Fifth Third Arena went through a massive 220,000-square-foot renovation, kicking UC school spirit up a notch. The update arena was transformed into a modern 360-degree seating bowl, featuring improved seating for 11,500 spectators. The refreshed arena features 6,808 linear feet of Trex Commercial ornamental steel and aluminum railing, including Tensiline™ Cable Railing, GripRail™ and Track Rail™ located on the upper and lower bowls, as well as Gridguard™ Mesh railing and GripRail on the concourse overlooks and stairs. Beyond the interior railing, Trex Commercial provided Gridguard railing with metal grating infill for the East Site entrance on the grand staircase and adjacent building.

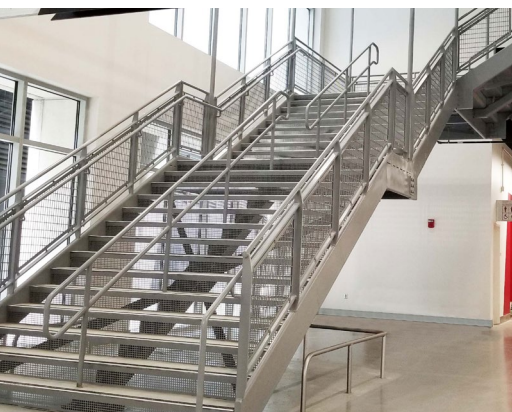

Tensiline Cable Railing with stainless steel cables can be found in front of fan seating areas and along stairs.

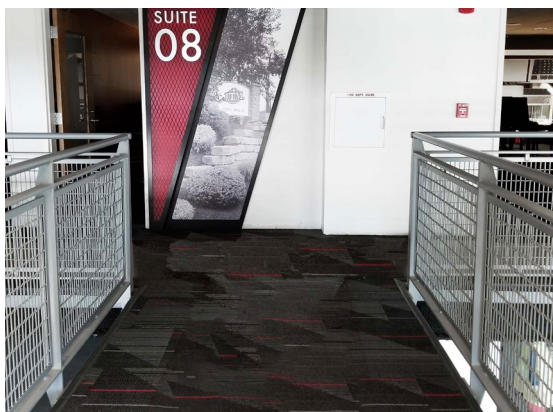

Track Rail with 1/2" clear laminated PVB interlayer is positioned in front of suite seating areas, creating clear sightlines.

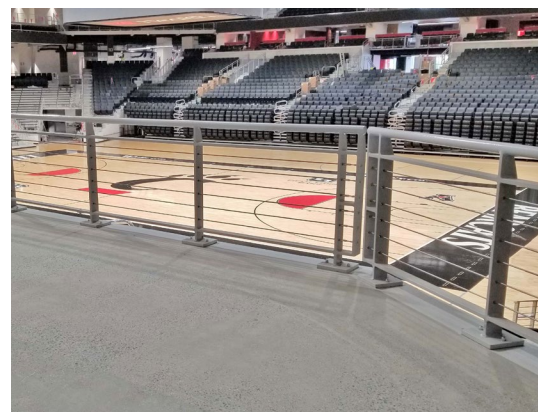

Gridguard aluminum railing with mesh infill is found on the concourse overlooks and stairs.

Gridguard Mesh Railing with aluminum handrail lines the grand staircase, with GripRail used as a divider for crowd control.

On the suite level, fans will find Gridguard Mesh Railing on the overlooks along the walkways.

Tensiline Cable Railing with handrail can be found in front of the ADA-compliant section at the arena.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
