

# Relia Beam Support

## Understructure

Maximize your venue or event space with the Relia Beam Support System. Great for orchestra pits, stage traps, VIP booths, tent flooring, and much more, Relia beams and legs facilitate quick strike, making setup and take down easy and efficient. Whether you are looking for optimal storage space underneath your system or supports that enable quick setup, the Relia Beam Support System is sure to elevate your space.

# Relia Beam Support

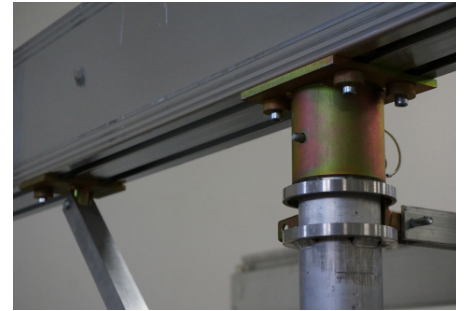

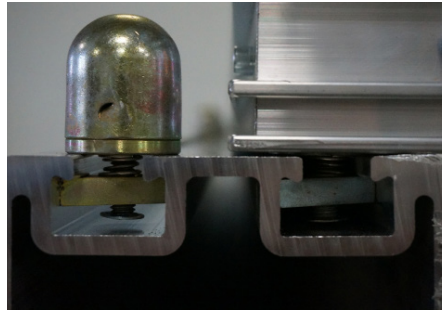

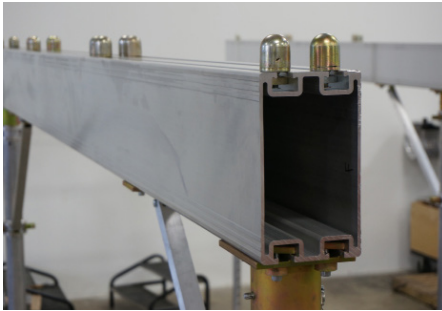

## Understructure

### Ease of Use & Modularity

Decreased labor costs. "Quick Strike" modular component design and easy to lift lightweight aluminum construction reduce setup and tear down time.

Improved access and storage below deck. Up to 16' clear span allows fewer supports for additional egress and storage space.

Maximized inventory. Relia beam system is fully compatible with the SC9600 bridge support system or use braced columns. Simple construction with few moving parts. Fully customizable for limitless design options.

### Technical Specifications

Uniform live load: 150 psf.

Span: 16' max

Deflection: L/360

Beam material: Extruded 6005A-T61

Aluminum custom shape with integrated strut-channels.
