

# CitiField, Outfield Seating Expansion

## Baseball Field

**Project:** CitiField  
**Completion:** July 2019

**Location:** Flushing Meadows, NY

**Scope:** Seeking to enhance the outfield wall and create a more engaging experience for fans, CitiField collaborated with Sightline to craft a new outfield VIP seating area. This project encompassed the design and construction of structural support framing, decking, a drink rail, and an ornate stairway that grants access from the current seating area. To ensure versatility and ease of installation, a movable section was incorporated to enable field access through the pre-existing tunnel. Additionally, Sightline delivered architectural railings and finishes that seamlessly complemented the ones they had previously supplied during the initial construction of the ballpark.

The VIP space provides an up close view of the action.

Decorative and functional drink rail provide amenity for fans.

Ribbed aluminum flooring provides a rigid and safe walking surface.

Track rail glass railing assures a clear view of the field.

Premium seating blends within the existing ballpark.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
