

# Crowd Control Barricades

## Accessories

Sightline Commercial Solutions' Crowd Control Barricades are manufactured to withstand the most demanding circumstances of any venue. These lightweight, steel, and aluminum constructed barricade sections only require two people for setup and take down. In addition, each section is equipped with the most effective, and yet the most simple, locking mechanism on the market, so that barricade walls of all sizes take only minutes to assemble. Each section can be folded compactly to fit almost any storage space. Modular Crowd Control Barricades are sure to complement any performance.
