

SC90[®] Composite Platform

Portable Platform

The SC90[®] Composite Platform features composite decking which is made from recycled materials, such as sawdust, plastic packaging, and reclaimed wood. This composite provides the appearance of a clean, wood finish without the maintenance. This platform is resistant to fade, stain, mold, and mildew, and can easily be cleaned with soap and water. Its strength and durability aligns with the top quality products you've come to learn and trust from Sightline Commercial Solutions.
